Editor's note

Enabling the Sustainable Journey in the Built Environment

After 150 years the World is coasting to the top of the oil curve but the view over the top is still obscured and we cannot see how steep the rest of the roller-coaster ride is - whether the steepness of the useful energy curve will cause societies to come off the rails, or if we have the knowledge and skills to manage the transformational change required in societies and organisations to stay on them. The aim of this electronic paper is to bring together the knowledge and skills that will enable the unavoidable low carbon transformation of the Built Environment. Your constructive comments are vital and welcome First Law of Sustainability in the #oneplanetworld goods and services can only grow at the rate at which their #resourceintensity can be reduced beyond that needed to balance the One Planet Equation 1 = P<C<R! <http://trailblazerbusinessfutures.wordpress.com/the-one-planet-equation/> Derek Deighton
